

The Proto AccuStitch ~

Is one of the lowest vibrating long-arm quilting machines designed
for longer hours of operation
while proving to reduce carpel tunnel syndrome.

This standard design features lower vibration and improved performance:

- Five year warranty standard on all mechanical and electrical parts
- Built-in Stitch Regulator assures all stitches are consistent at any speed
- Heavy duty 350lb. Table up to 14 feet long
- Computer Controlled Stitch Regulator (as well as standard Stitch Modes)
- Computer Controlled Two-Station Electronic Needle Positioner
- Laser Alignment tool
- Adjustable Hopping Foot Height
- One Stitch feature for basting
- Batting Access Lever (for easy access to the batting)
- Vertical and Horizontal Channel Locks
- Power Fabric Advance & Two-Station Needle Positioner
- Throat size is 10 inches X 24 inches
- Rotary Thread Tensioner
- 12 in. florescent light
- Removeable keypad for front or rear operation
- One piece "C" frame, cast aluminum head (not an assembly)
- Ergonomically adjustable handles
- Quiet running timing belts reduce further vibration
- Built-in 'Stitch-in-a-Ditch' Guide
- Compustitch, fully programmable model, uses built in teach mode
